

Exterior Home Improvements & Modifications

If you are considering a home improvement project that alters the exterior of your property, or are considering adding a portable building/shed, pool, solar panels, changing the style of your fence, etc., your first action is to review your applicable [Bills of Assurance](#) to understand what is and isn't allowed and if restrictions exist. You will then need to contact the [CCoA Architectural Review Committee](#) and the Maumelle (or North Little Rock) Building Permits office as applicable.
